HOW TO CALCULATE YOUR INSURANCE PREMIUMS WITH CARESUPER

Your new level of cover and premiums will depend on your age, gender and occupational category.

Use 'Table 1. Age based death and TPD cover amounts' on page 4 of this flyer to find your cover amount by referring to your age and occupational category.
To calculate your annual insurance fee, find your weekly premium using your age and gender in 'Table 2. Premium rates – weekly amount' on page 5 of this flyer. Annual premium = Weekly premium x 52 weeks

EXAMPLE OF AGE-BASED COVER CALCULATION

If you are a male aged 28 at the time of the transfer and in the General occupation category (without any loading or exclusions):

- Based on table 1, your cover amount for the year is \$147,000 for death cover and \$367,500 in TPD, and
- Based on table 2, applying the premium rate for this age, the weekly premium for death would be \$1.93 and \$2.92 for TPD cover.

Your annual premium (weekly premium x 52 weeks):

COVER TYPE	CALCULATION	PREMIUM (P.A.)
DEATH	\$1.93 x 52	\$100.36
TPD	\$2.92 x 52	\$151.84
TOTAL	\$100.36 + \$151.84	\$252.20

Insurance fees are rounded for disclosure only and may vary slightly from what is deducted from your account. This flyer does not take in to account any exclusions or loadings that may apply to your individual cover.
